

/ CELLULAR CONNECTIVITY OFFERING

Get the benefits of using Kerlink's products (Wirnet™ iZeptoCell Cellular, Wirnet™ iStation, Wirnet™ iFemtoCell-evolution, Wirnet™ iBTS/Compact/64 Highway) with the best-in-class cellular connectivity offering offered by Avnet Silica, powered by BICS.

The cellular connectivity offering means that users need only one SIM card that contains worldwide coverage on all technologies including 2G/3G/4G/LTE-M.

Benefits of Avnet Silica solution, powered by BICS:

- Worldwide coverage
- Multi-IMSI profile
- Cellular network: 2G/3G/4G
- Cellular LPWAN: LTE-M
- Full Connectivity Management Platform
- 24/7 customer support
- Global roaming: automatic switching to optimal network locally

For test purposes, we've defined a package including 1 GB of prepaid connectivity per Kerlink product to be used over one year.

Area	Cost € (One shot)
EU28 + UK	11
US	22
Singapore	164
Japan	164
Canada	24

For mass production, please refer to our postpaid model. Billing of the exact data consumption per month, per device.

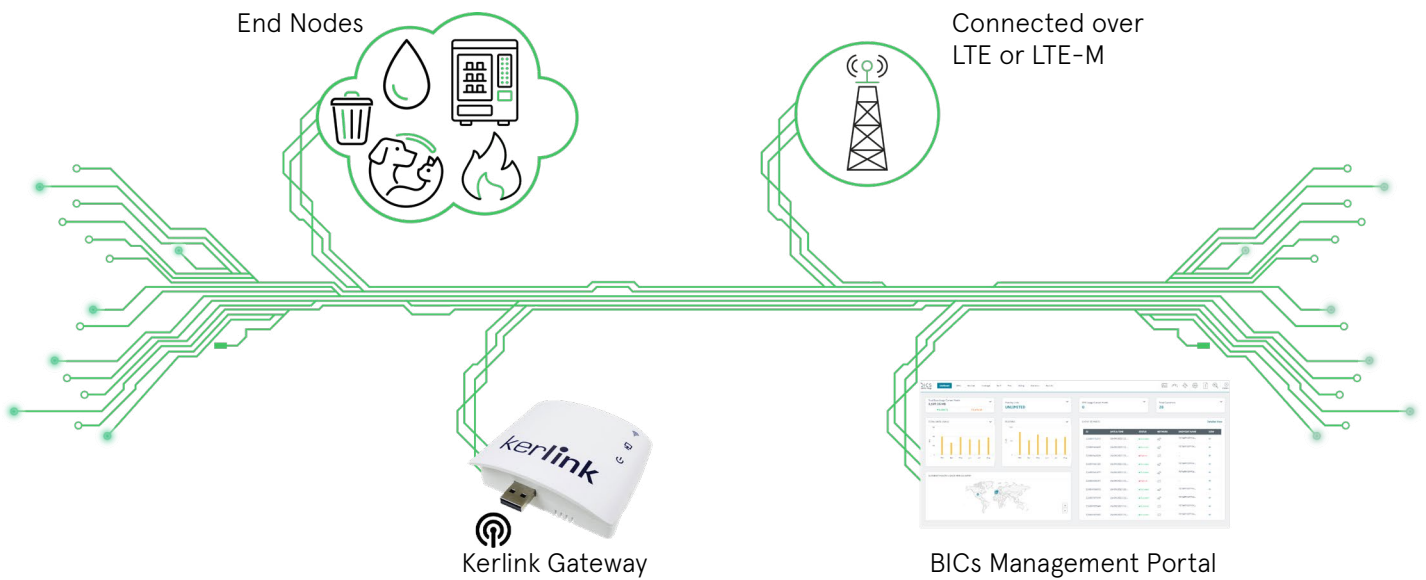

Area	Cost MB (€)	Cost 250MB/month (€)
EU28 + UK	0,005	1,75
US	0,016	4,5
Singapore	0,158	40
Japan	0,158	40
Canada	0,018	5

/ HOW IT WORKS

The BICS SIM for Things Management Portal allows you to:

- Activate/Suspend SIM cards
- Locate all devices
- Manage several users/rights
- Access a free of charge API
- Access billing area
- Manage your own coverage
